Flying your own aircraft remains the single most effective way to do business in multiple locations. With the reduction in regional airline service, it simply isn't possible to do business in Syracuse and Rochester and be back in Manhattan the same day. When you fly, you do business on your own schedule, not someone else's.

You can learn to fly in two weeks. A different airport every landing and a different state every day. A two week adventure you will remember for the rest of your life.

Learning to fly is a great adult challenge – not impossible, but requiring some dedication. Piloting an aircraft for pleasure is a fulfilling experience. And by flying yourself, your vacation home becomes that much more useful.

Why the Best Instruction?

Flying is not just a hobby. It is also serious business.

Flying may be as easy as driving a car, but you don't drive a car two miles up. You don't have to talk to air traffic controllers when you drive. You need to understand what makes the airplane fly, the weather, and air regulations – the aeronautical decision making tools to exercise judgement in the air.

Best in Flight instructors each have a minimum of 3000 hours accident-free pilot-in-command time.
