

DA40 Introductory Flight

Have you always dreamed of flying?

You can fly the Diamond DA40 DiamondStar, a modern four place aircraft equipped with G1000 glass panel, autopilot, NexRad weather, and TIS traffic information system.

On your introductory flight, you and two of your friends can see Northern New Jersey from the air (depending on weather and outdoor events). You and your instructor will together inspect the airplane; this is your chance to learn the parts of the airplane and the controls. You will talk to air traffic control (we'll give you a script). You will taxi the airplane (drive to the runway). Using your newfound taxi skills you will push the throttle forward, steer down the runway and take off.

We will fly over northern New Jersey, seeing the lakes in the summer, leaves in the autumn, skiers in the winter, and flowers in the spring. This is a first lesson; you will be eligible for a logbook entry.

The whole experience takes about two hours, including a half hour of personalized ground instruction and an hour in the airplane. It is \$259.00.

To schedule your introductory flight, call (973) 683-9002

Flying your own aircraft remains the single most effective way to do business in multiple locations. With the reduction in regional airline service, it simply isn't possible to do business in Syracuse and Rochester and be back in Manhattan the same day. When you fly, you do business on your own schedule, not someone else's.

Learning to fly typically takes several months. You can take a year or two but it won't be cheap. You can learn to fly in two weeks; that will be a full-time adventure you will remember for the rest of your life.

Learning to fly is a great adult challenge – not impossible, but requiring some dedication. Piloting an aircraft for pleasure is a fulfilling experience. And by flying yourself, your vacation home becomes that much more useful.

Morristown Municipal Airport

Why the Best Instruction?

Flying is not just a hobby. It is also serious business.

Flying may be as easy as driving a car, but you don't drive a car two miles up. You don't have to talk to air traffic controllers when you drive. You need to understand what makes the airplane fly, the weather, and air regulations – the aeronautical decision making tools to exercise judgement in the air.

Best in Flight instructors each have a minimum of 3000 hours accident-free pilot-in-command time.
