

Instrument Pilot Ground School

BEST in FLIGHT

Summer Session — July Aug 2011

Tuesday Evenings 7:00 p.m. to 10:00 p.m.

9 Airport Road, Morristown

The Best in Flight Instrument Pilot Ground School is an intensive eight-week course that provides the solid foundation you need for developing aeronautical judgement, to plan and fly safely in the weather, to communicate effectively with ATC, to understand your aircraft's capabilities and limitations and to anticipate its behavior under any and all flight conditions – so you can safely get the most possible enjoyment out of your flying experience.

Weekly classroom sessions are supplemented with reading assignments, flight planning exercises, together with hands-on experience planning an actual flight. This is not simply a written test prep class; it is a complete ground school.

Graduates of Best in Flight ground schools are invited to attend as a refresher, free of charge.

Class Date	Subject Matter
-------------------	-----------------------

05 July	Introduction and Definitions; Basic Attitude Flying
12 July	Federal Aviation Regulations, Radio Communications
19 July	Navigation, Low Altitude Chart, AFD, TERPS
